SUMMARY

Software developer on the Gold Coast. I build and maintain production software that connects business operations, enterprise systems and data: from REST APIs and cloud infrastructure to warehouse automation and AI-powered tools. Five systems in daily use at a wholesale distributor: a transport management system, a warehouse platform, a driver app, a partner API and an operations portal with an AI assistant. Before software, four years in banking. Diploma of Information Technology, Database and Data Management.

EXPERIENCE

Web Administrator `Nov 2023 – now`

Wholesale distribution company · Gold Coast, QLD, Australia

- Built and maintain the company's freight platform (Python, Flask, PostgreSQL), integrating 9 external systems: carrier APIs, the ERP, maps and routing. 10,000+ external-carrier consignments booked between April and October 2026.
- Designed and built a partner-facing carrier API under an OpenAPI 3.1 contract, with a sandbox and 613 automated tests.
- Built the warehouse platform (20+ features, 20+ scheduled sync jobs), the driver app for iOS and Android, and an operations portal with a read-only AI assistant over the company's databases.
- Own deployments on AWS and Vercel, databases, access control and monitoring; support and train dispatch, warehouse, drivers and management.

Bank Officer, Client Relationship `Oct 2018 – Nov 2022`

Banco Bradesco · Jundiaí, São Paulo, Brazil

- Started as a teller and moved into commercial account management: client portfolios, account opening, credit, insurance and investment products.
- Worked to sales and service targets under compliance, KYC and security procedures, on core banking and CRM systems every day.

Checkout Supervisor · Supermarket group `Oct 2017 – Nov 2018`

Administrative Apprentice · São Paulo State Cancer Institute (ICESP) `Mar 2016 – Mar 2017`

SYSTEMS IN PRODUCTION

Transport Management System. Quoting, booking and dispatching freight, plus the company's own vans.

Operations Portal and AI Assistant. One door to every system: sign-in, permissions, ready-made analytics and an AI assistant for the team.

Carrier Integration API. Turns the company's own vans into a carrier other freight systems can book.

Warehouse Operations Platform. The software the warehouse floor runs on.

Driver App. Driver app for route navigation, offline proof of delivery and live tracking.

SKILLS

Daily	Python, JavaScript, SQL, Flask, PostgreSQL, Supabase, Git / GitHub, Claude / AI tooling
Often	TypeScript, Node.js / Express, SQLAlchemy, REST APIs / JWT, React, Next.js, Tailwind CSS, SQLite, GitHub Actions, AWS, Docker, Linux, Vercel, Sentry, Google Maps Platform, Excel / Power Query, Zebra ZPL

EDUCATION

Diploma of Information Technology (ICT50220), Database and Data Management

Mindroom Institute · Gold Coast, QLD, Australia · Apr 2024 – Jun 2026

LANGUAGES

Portuguese (native), English (professional)
